Adults 18-34	~75%								
Adults 25-54	~55%								
Adults 55+	~25%								

<p>Publish Date: 2Q 10</p>	<p>"Online video viewing will continue to increase at high rates, therefore advertisers, content providers, and service operators must identify the true impact of online video on the traditional broadcast and cable TV industry," said Heather Way, research analyst, Parks Associates. "While inadequate audience reach, metric standardization, and consumer affinity for traditional TV viewing inhibit immediate growth, advertisers' ability to incorporate cross-platform audience targeting as well as increased content offerings via TV Everywhere initiatives drive steady, long-term online video advertising revenue growth."</p>
